Scoring

Map: **1 point for the correct region**. A correct region counts even if the grid square is imperfect. Accept Burgundy for any of the Burgundy wines; no village or vineyard required. Note: **1 point** for the matching description. Price: **1 point** for the matching purchase price. No half-points. 18 possible points across 6 wines.

Score the team sheets on paper. The app's existing automatic quiz scoring has different map and category rules. Use it for tasting-card collection and wine reveals.

Before pouring

1. Check the actual labels against this list, including vintages. The vintages here came from the current Polet listings.
2. Cover each bottle and label it with its glass letter. Keep the same letters all evening.
3. Deal each person a different two-part card name and one role sheet. Everyone keeps their name throughout the tasting.
4. For each wine: individual cards first, team discussion, then collect the team's answers before the reveal.

*** Pascerette:** Polet lists France, while the producer is based in Burgundy. A more precise grape origin for this cuvée has not been confirmed. Accept France or Burgundy for this bottle so an unsupported precision does not cost anyone a point. No exact grid square is required.

Print one copy for the host. All six wine facts and prices are copied from the receipt tasting. Tea is excluded.
